-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-3, the term "general" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "general"), thereby rendering the scope of the claim(s) unascertainable.

In claim 1, line 8, it is unclear if or how "an atom" differs from the hydrogen atom or the halogen atom subsequently recited.

In claim 1, line 9, the markush group language "selected from a group comprising" is improper.

***Claim Rejections - 35 USC § 102/103***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. 2003-0045669 (Tsuji et al).

Tsuji et al disclose adhesive resin compositions comprising a polyimide obtained by reacting a tetracarboxylic acid dianhydride and an aromatic diamine and a thermosetting resin. Suitable aromatic diamines include diamines falling within the scope of applicants' claimed formula (1). See patentees' formula (4) as defined when Y represents  $-C(=O)-$ , examples and claims.

The disclosure of the reference meets the requirements of the present claims both in terms of the types of materials added and their contents. The onus is shifted to applicants to establish that the claims of the present claims are not the same as or obvious from that set forth by the reference.

As to the claimed semiconductor devices, it is maintained that the production of such would have been immediately envisaged from the general disclosure of the reference to one having ordinary skill in the art.

5. Claims 1-9 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. 6,693,162 (Tsuji et al).

formula (1). See patentees' formula (4) as defined when Y represents -C(=O)-, examples and claims.
